

Chowdhury Md Rajib Sarwar

Senior iOS Engineer

+1 (929) 462-4715 | md.rajib.sarwar@gmail.com | [linkedin.com/in/rajib-sarwar](https://www.linkedin.com/in/rajib-sarwar)

iOS engineer with 10+ years building enterprise and consumer apps, leading mobile teams, and modernizing Swift/Objective-C systems. Expertise in offline synchronization, real-time location, and performance.

EXPERIENCE

Senior Software Engineer, iOS | Limosys LLC

Englewood Cliffs, NJ

Jan 2023 - Present

- Replaced hard-coded configuration across 200+ white-label apps with a server-driven pipeline, cutting new-client deployment steps 75% (20 to 5).
- Modernized Objective-C MVC monoliths into modular Swift MVVM components; integrated WKWebView JavaScript bridges and centralized client assets in Amazon S3.
- Built offline persistence and background synchronization for LSN Driver, preserving GPS records and signature captures through network outages.
- Unblocked in-car payment deployment by partnering with Worldpay engineers to debug the Bluetooth triPOS SDK and add diagnostic logging.
- Designing a GraphHopper/Hazelcast map-matching pipeline to snap 10-second GPS updates to road networks for fleet routing.

Mobile Programmer / Team Lead | New Jersey Institute of Technology

Newark, NJ

Sep 2021 - Dec 2022

DANA Project | 2023 Technology Innovation Award, NJLA CUS/ACRL-NJ

- Led iOS, Android, and UI/UX contributors from concept to launch of the award-winning DANA mobile apps.
- Integrated 3 external APIs with university systems to power 4 location-aware features; mentored developers on UIKit, memory management, and state preservation.

Engineering Manager, Mobile | Affle (acquired Shoffr)

Singapore / Bengaluru, India

Jan 2017 - Sep 2021

- Led mobile architecture and iOS delivery for Shoffr; built offline sync and retailer messaging to support inventory discovery and in-store footfall attribution.
- Designed and deployed the Vizury mobile SDK with background processing and offline caching to capture behavior and ad impressions within battery and CPU constraints.

Software Engineer, iOS | AnyConnect

Dhaka, Bangladesh / Singapore

Oct 2014 - Jul 2016

- Stabilized Philips uGrow video streaming by fixing A/V rendering and memory issues and improving XMPP/raw-socket connections to IoT cameras.
- Restored 60 fps UI performance by moving work off the main thread; earned promotion and relocation from the Dhaka engineering center to Singapore.

PROJECTS

Qibrah | Independent iOS Developer | [App Store](#)

- Built and launched a SwiftUI/MVVM app with AVFoundation audio playback, Live Activities, and local persistence for offline reading progress and bookmarks.
- Integrated on-device Apple Speech recognition with a custom algorithm to synchronize text highlighting with audio progression.

TECHNICAL SKILLS

iOS & languages: Swift, Objective-C, SwiftUI, UIKit, Kotlin, C++ interoperability, Core Location

Architecture & data: MVVM, dependency injection, Swift Concurrency, GCD, Core Data, REST APIs

Quality & performance: XCTest, XCUITest, CI/CD, Xcode Instruments, memory and crash analysis

EDUCATION

MS, Computer Science | New Jersey Institute of Technology

Dec 2022

BS, Computer Science | Ahsanullah University of Science and Technology

Aug 2014
